Keeping track of your oil, **saving** you money.

iLogic Monitoring Device

Fuelogic are proud to announce our new commercial fuel management system.

iLogic is the worlds first battery driven radar level monitor which allows clients to rely on the service to re-order fuel, saving time and money.

- Avoid emergency delivery charges
- No returned product fees
- No chance for production to be down due to no fuel on site

HIGH ACCURACY

High accuracy IoT level sensor that be remotely monitor tanks up to 4m in height

WEATHERPROOF

Unaffected by environmental Factors such as temperature, dust or humidity.

LONG LIFE

Ultra Low Power to remotely Measure level for up to 5 years.

HIGH ACCURACY

High accuracy IoT level sensor that be remotely monitor tanks up to 4m in height

iLogic Monitoring Device

Run by
2g data

Minimum 5
year battery life

Maximum Tank
height of
3.5 meters

Suitable for
plastic or
metal tanks

Minimum 12
months
contract

Easy installation
